ABOUT

I build simple ways for people to earn from the equipment they already own.

I'm the founder of EnviroMine and Tysons Technologies, based in Tysons, Virginia.

What I do today

- Bitcoin mining consulting — clear, honest advice before you spend anything
- Home mining setups — including the Bitwater element, a water-heater element that mines Bitcoin while it heats your water
- Hardware wallets — set up right, so your Bitcoin stays yours
- Helium hotspots — placed in busy locations around Fairfax County, chosen using Helium demand maps

How I got here

I spent 25+ years running customer operations in telecom and technology — Director of Customer Care at Eureka Networks (a network of 175 office buildings in Washington, DC, through four mergers), General Manager in DC at Broadview Networks, and Chief Information Officer / Head of Customer Success at Boring Protocol, a global decentralized VPN (2022–2023).

That background is the point: new technology only works if someone answers the phone, explains it plainly, and stays until it runs. That's how I run my own companies.

Want to talk mining, hotspots, or a partnership? Call 202.697.4600 or message me on LinkedIn. Web: tysons.tech

EXPERIENCE

EnviroMine — Founder

Jul 2015 – Present · Washington DC–Baltimore Area

I founded EnviroMine to bring decentralized networks — and the income they can create — to everyday homes and businesses.

- Today: Bitcoin mining and consulting, home mining setups and hardware wallets; the Bitwater water-heater element miner (with Heatbit); Helium hotspot placement in high-traffic locations, sited with demand maps
- Earlier: decentralized LoRa and 5G networks with token incentives; network design, sensors and trackers, digital-asset consulting; EnviroMiner, our trademarked multi-token miner
- I lead partnerships, product, sales, marketing, and training

Tysons Technologies — Founder

May 2009 – Present · Washington DC–Baltimore Area

IT consulting and on-site tech support for homes and businesses.

- Network design, system sales, setup, and troubleshooting
- Colocation, data center, and security solutions; Web3 and NFT consulting
- I run day-to-day operations, with one rule: the customer understands what they bought, and it works

Boring Protocol — Chief Information Officer / Head of Customer Success

Sep 2022 – Aug 2023 · Washington, DC

Boring Protocol runs a global decentralized VPN (dVPN).

- Set the company's Web3 strategy and blockchain architecture
- Built the customer success program and ran technical support channels
- Launched a self-help portal; worked with partners to improve results and grow the network

Broadview Networks (now part of Windstream) — General Manager, Washington DC

May 2007 – May 2009 · Washington DC–Baltimore Area

- Ran the DC office: sales, marketing, tech support, dispatch, and colocation
- Managed operations through acquisitions, including tech support, CRM, billing, and sales targets
- Moved eLink's operations to a CLEC offering VoIP service in New York and Pennsylvania

Eureka Networks — Director of Customer Care

Mar 2000 – May 2007 · Washington DC–Baltimore Area

- Led customer care for a network of 175 commercial office buildings wired with fiber and Ethernet
- Guided the DC office through four mergers, ending with the acquisition by Broadview Networks
- Oversaw customer care, technical support, sales, and marketing; helped transition the business to a CLEC with VoIP

POWERworx Online — Customer Care Manager

Feb 1997 – Dec 1999 · Boulder, Colorado

- Led and trained the team serving 10,000+ affiliate-based ISP accounts
- Promoted to Director of Customer Care within a year, based on retention and growth

Regal Hotels International — Food & Beverage Manager

Mar 1994 – Feb 1997 · Boulder, Colorado

- Assistant to the Executive Chef at the Regal Harvest House — banquets, two restaurants, and room service
- Promoted to Beverage Manager for all on-site bars and restaurants
- Ran game-day events for 10,000+ CU Buffalo fans, generating $100k+ in daily revenue

The Fox Theatre — Security Professional

Apr 1994 – Dec 1997 · Boulder, Colorado

Door, stage management, and backstage security at the Fox Theatre on The Hill and the Boulder Theater on Pearl Street.

EDUCATION

- University of Colorado Boulder — 1989–1992
- Frostburg State University
- Bethesda-Chevy Chase High School
- Maret School
